Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Asum (5836810).

Asum shows an interproximal strip 22, Fig. 7, having a smooth central zone 25 and two abrasive zones 24.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asum (5836810) in view of Blank (6386873). Asum shows the structure as described above, however, does not show specifically state that the first abrasive zone is on a single side. Blank teaches that it is known to use abrasive on only one side, column 4, lines 2-14. It would be obvious to one of ordinary skill in the art to modify Asum to include abrasive on a single side as taught by Blank in order to deliver the abrasive action to the desired location.

Claim 3-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asum (5836810) in view of Blank (6386873) as applied to claim 2 above, and further in view of Kyotani (4690642). Asum teaches different degrees of abrasive at column 3, lines 60-64, however, does not show using abrasives of different degrees on different sides. Blank further teaches using both sides, column 4, lines 2-14, and Kyotani teaches using different degrees of abrasive on one side, Fig. 4, or on different sides, Fig. 5. It would be obvious to one of ordinary skill in the art to modify Asum to include using abrasive on more than one side as shown by Blank, and further, to use different degrees of abrasive on different sides as shown by Kyotani in order to apply the desired degree of abrasive to the desired locations. The specific number of different degrees and their locations are obvious matters of choice in the degree and location of known structures to one of ordinary skill in the art. As to claims 10-16, the method steps are held to be obvious in view of the shown structure.

Drawings

The drawings filed September 17, 2003 have been found to be acceptable by the examiner.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Glover (959,054) shows abrasive zones.
